

NCI 4700 Coax Services

NCI 4700 Coax Services software, combined with either **NCI 4700 PCI Adapter** or **NCI 3270 Coax Adapter**, allows a PC to fully emulate IBM 4704-2/3 or 3278-2 display terminals when coax-attached to IBM 4701/2 or 3174/3274 Controllers.

The NCI 4700 Coax Services system software provides terminal emulation combined with unique customization features to allow the institution and/or operator to tailor each PC workstation to obtain optimum ergonomics.

NCI 4700 PCI Adapter allows you to connect PCs to your IBM 4700 Controller while gaining additional network security and virus protection. It provides 3278/79 emulation, remote IPL, data security and virus protection -- all on a single adapter board.

The **NCI 4700 PCI** attaches both PC bus and

Micro Channel bus PCs to an IBM 4700 Controller. NCI integrates this DCA attachment with remote IPL for data integrity and diskette drive disable for virus protection.

NCI 3270 Coax Adapter provides you with a reliable and cost-effective 3270 coax interface for PC-to-host attachment.

Whether you are attaching PS/2s to IBM 4701/4702 Controllers, IBM 3174/3274 Control Units or an IBM 9370 Workstation Subsystem, the **NCI 3270 COAX Adapter** will provide your institution with a 3270 interface that is fully compatible with all IBM and IRMA 3270 emulation software.

NCI's MicroChannel version, **NCI 3270 Coax/MC Adapter**, provides the same capabilities as the PC bus version, including the ability to fit into virtually any size PS/2 expansion slot.

NCI 4700 Coax Services

Advanced features and function of this system software, which provides terminal emulation, include:

- Virtual file facility
- High-level language interface (HLLI)
- Expanded memory support
- Multiple virtual and reset volumes
- Extended API features
- Customizable print screen processing
- Several host/4700 file transfer options
- PC-to-PC printer redirection
- IBM 3287 printer redirection
- Local key tracking
