

INTRODUCING

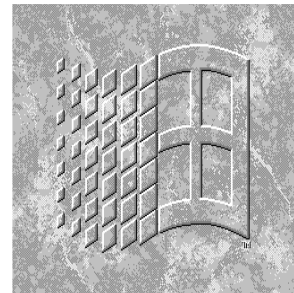

OS/2 To NT Conversion Service

This service offers a solution to institutions that have adopted OS/2 as their strategic direction, but now wish to migrate their systems to Windows NT. The NCI OS/2 to Windows NT Conversion Service offers two alternative approaches, single-shot and multi-shot, as a basis for all conversions from OS/2 to Windows NT.

With a **single-shot** conversion, NCI produces a Windows NT system from the OS/2 system, on the basis that there will be a single cut-over from the OS/2 system to the Windows NT system. This single-shot conversion is suitable for cases where the OS/2 system is stable and requires no further enhancement (although the converted Windows NT system may be used as a base for further enhancement).

With a **multi-shot** conversion, NCI produces a Windows NT *conversion toolkit*. By means of the conversion toolkit, the OS/2 system may be repeatedly converted to a Windows NT system. A multi-shot conversion is suitable for cases in which the OS/2 system is constantly undergoing enhancement and it's necessary to maintain OS/2 and Windows NT systems in parallel.

NETWORK CONTROLS INTERNATIONAL, INC.
An IFS International Holdings, Inc. Company

NCI History

Founded in 1983, NCI has served the financial services industry by developing and implementing large-scale connectivity, migration and retail delivery solutions.

Over the past two decades, we've directed our resources to best serve bankers' changing needs with low-cost, high-tech products. In that time, we've advanced from branch value-add, to migration, to branch automation, to business solutions.

Now, with our newest product, **NCI Business Centre™**, we've developed the next generation, enterprise-wide technology to automate all existing delivery channel business functions under a common platform.

NCI Clients

Our dynamic team of banking systems software, hardware and financial industry experts offer a broad range of skills to our global customer base, which includes:

- | National City Corporation, Ohio, USA
- | Capitol Federal Savings, Kansas, USA
- | Bank of America, North Carolina, USA
- | AllFirst Bank, Maryland, USA
- | Citizens Bank, Rhode Island, USA
