

# NCI Twin Safe Server

## Available for Windows NT and for OS/2

The ASCOM Twin Safe, a state-of-the-art, high-security teller assist unit (TAU), can be fully integrated within a customer service and teller environment or operate in an off-line, stand-alone mode.

**NCI Twin Safe Server™** combines a software server and teller application to provide complete offline and online support for the Ascom Twin Safe within retail branch environments.

Using either the **NCI Twin Safe Server for Windows NT** or the **NCI Twin Safe Server for OS/2**, the Twin Safe may be introduced into branches in an offline mode and brought online to the branch application software at a later date.

Alternatively, both products enable an institution to make a speedy introduction of the Twin Safe in an online manner.

Regardless of how the Twin Safe is utilized, **NCI Twin Safe Server** enables the Twin Safe to be deployed so that maximum benefit is brought to the entire branch operation in the shortest time with minimum cost and risk.

**NCI Twin Safe Server** includes NCI Teller and NCI Manager. NCI Teller, a powerful, user application, provides complete teller functionality and supports all of the services provided by NCI Manager, the engine which drives the entire system. In addition, all of the services provided by NCI Manager can also be accessed by existing or new retail banking applications.

**NCI Twin Safe Server** provides additional value by enabling the Twin Safe cash recycling device to be networked and used by multiple users.

Full user access and management features are included, as well as multiple levels of Application Programming Interfaces for integration within existing environments.

This unique software also provides immediate totals and other important usage information for instant cash traffic analysis. The analysis tools help your bank to optimize cash management and reduce operational costs.

**NCI Twin Safe Server** is available in Europe, Asia/Pacific, South Africa and Canada.

# NCI Twin Safe Server Features And Benefits

## Features

- Secure and flexible offline operation which allows the Twin Safe to be introduced into branches with no impact on current systems.
- Online capability so that the Twin Safe may easily become an integral component of the branch system.
- Support for many concurrent users to make the most cost-effective use of the Twin Safe.
- Flexibility of Twin Safe access throughout the whole branch so that all personnel may benefit from it.
- A proven software solution that is constantly evolving and offering new facilities to its users.
- Sophisticated security features enable branch re-design and re-engineering to be undertaken without increasing exposure to theft or fraud.
- An easy-to-use graphical user interface which requires minimal training, but allows tellers to perform their jobs quickly and efficiently.
- Comprehensive totalling and journaling so branch staff and management may quickly resolve any problems, as well as expedite end-of-day branch reconciliation.

## Benefits

- Built-in transaction, configuration, operation and maintenance services.
- Flexible start-of-day/end-of-day processing.
- Multi-language support, variable by user.
- Nine user-configurable denomination mixes for withdrawals.
- Magnetic stripe reader option.
- Comprehensive user security.
- Configurable, single-shot sign-on.
- Twin Safe note, reject note and coin totals.
- Totalling by teller, workstation and Twin Safe.
- Electronic transaction journal with “drill-down” and sophisticated querying.
- Totals and journal may be printed or viewed.
- Super transactions, such as batch deposit and withdrawal before deposit.
