

NCI 4700 Wizard™ Migration Software

Shows You A New Trick!

NCI 4700 Wizard runs IBM 4700 applications on Windows NT and 2000!

You may have known that **NCI 4700 Wizard™** helps you migrate to a DOS or OS/2 PC LAN environment.

Now this amazing PC-based, client/server software solution runs IBM 4700 applications on Windows NT and 2000, as well.

No matter which operating system you choose, you'll protect your investment in 4700 branch software until the time is right for a change.

NCI 4700 Wizard emulates the IBM 4700 Controller microcode and executes 4700 FCL instructions on a PC. It also simulates the functions of a 4700 (or 3600) Controller on a LAN or a WAN network.

Best of all, the PC display and keyboard emulate 4704 display stations so your staff will need little or no training.

With **NCI 4700 Wizard**, the constraints of the IBM 4700 Controller disappear. Through PC technology, **NCI 4700 Wizard** eliminates disk capacity and memory limitations and removes the need for multiple CPGENs.

Join the financial institutions around the world who are now running their 4700 applications on a PC. Simply give all your 4700 applications (such as ABCS, COLTS, ADMINPP and SAFE) to **NCI 4700 Wizard** and take a seat at your PC. **NCI 4700 Wizard** will handle the rest -- right before your very eyes.

NCI 4700 Wizard Puts the Power in Your Hands.

If you want to retain your 4700-based loop devices and connect them to a PC-server-based LAN environment, NCI can do that, too.

NCI 4700 XOVER (an NCI adapter card that connects 4700-based loop devices to a PC server) makes the transition of B-loop devices from an IBM 4700 network to a PC LAN environment easy and cost effective.

So, if you want to migrate your existing printers (4710, 4715, 4720, 3616, 4722 and 4712) or your 4700 self-service and cash dispenser devices (3624, 4731, 4733, 4736, 4721 and 3621) to a PC LAN, NCI 4700 XOVER with NCI 4700 Wizard makes it happen.

When you combine NCI 4700 XOVER with NCI 4700 Wizard, here's what you get:

- NCI 4700 Wizard executes the 4700 applications on a PC server.
- NCI 4700 XOVER connects your 4700 devices to a PC server.
- Use of your existing 4700 applications in a PC LAN.
- Use of your existing ATMS, 4704 displays and 47XX printers in a PC LAN.
- The flexibility to run 4700 applications in both 4700 and PC LAN environments.
- Maintenance of only one application for both 4700 and PC LAN environments.
- NCI 4700 Wizard may support both 4704 displays and PC displays in an intermixed B-loop, DCA and LAN network environment.
